PERFORMANCE & PROTECTION UNCOMPROMISING

POWER

It's **DNA** : gather in a single string qualities currently obtainable only when hybridizing 2 different strings.

It's **100% polyamide composition** and its **co-extruded structure** bring a double benefit : the core absorbs harmful vibrations and provides great comfort and touch, while the outer skin generates incomparable energy to offer a powerful game!

PERFORMANCE & PROTECTION UNCOMPROMISING

X10 MORE PERFORMING THAN ANY MULTI

X10 guarantees powerful and precise shots and an unbeatable ball feel. It reduces musculotendinous fatigue and keeps away injuries for competition players.

X12 THE SOFT AND DYNAMIC MONO

X12 provides far enough comfort and power while increasing abilities in order to hit good tennis shots ! That string will enhance the performance and avoid injuries for blockers and intermediate players.

HYBRID SERIES A PURE HYBRID STRING

It is now possible to join monofilament of different conceptions on the same plan. The polyamide monofilament will offer more power and amplify the feeling for more comfort and tolerance to off-centering. The polyester monofilament will provide durability, effect and control for powerful competition players.
